Designed by PNW architect Mike Daffron, this contemporary home showcases his unique style and sits quietly within a serene, wooded setting, offering privacy, territorial views, and a blend of seclusion and convenience. Exceptionally well suited for multi-generational living, the home spans three levels with two laundry rooms and multiple private spaces. The lower level includes two bedrooms, a bathroom with shower, a second laundry area with newer washer and dryer, a new vanity and toilet, and a flexible room with deck access. The upper level is dedicated to a private primary suite featuring its own laundry, ensuite bath, and a cozy wood burning fireplace. The top level adds another bedroom with bathroom and a loft seating area—ideal for guests or extended household members. The property has been meticulously maintained with major upgrades, including a 2023 roof, 2020 windows, updated attic and crawl space insulation, a new vapor barrier, ductless mini splits, an upgraded electrical panel, and a tankless water heater. The large, updated kitchen offers granite countertops, abundant cabinetry, a gas cooktop, double ovens, and excellent flow for both daily living and entertaining. A built-in bar with wine fridge enhances the home's hosting appeal. Outdoor living is equally inviting, with a spacious composite deck overlooking tranquil surroundings and a 2025 seven-person hot tub with lounge. A Tesla EV charger adds convenience.
